## Design Features

1. Stainless Steel - 316L (ISO:5832-1) high fatigue resistance and excellent biocompatibility for long term success of stem.
2. Available in standard and high offset to accurately restore patient anatomy.
3. Standard 12/14 Taper self-Locking connection.
4. Highly polished surface can minimize the generation of wear particles and debris, which can contribute to implant loosening and failure over time.
5. Cemented Hip stem is come with tapered geometry incorporate anti-rotation features to prevent rotational instability and ensure proper alignment.
6. Cemented fixation.

## Centralizer

1. It's designed to precisely position the distal tip of the Hip Stem within the bone canal, ensuring uniform distribution of bone cement around the stem. This design minimizes the risk of cement "punch-out" fractures and enhances implant stability by maintaining optimal alignment and spacing.

**Revive • Relieve • Renew**  
**Unleashing Mobility with Precision Joints.**
